

THE FRIENDS WITH FOUR KEYS

THE STRUCTURE, v2.2: CHAPTERS AND LEAD PACKAGES

v2.2, 2026-09-01, same day: F1 RULED. The season notch, Stephen's own design after a three-source blind batch (39 candidates, `four-keys-notch-candidates-v1.md`; his verdict on the batch's whole class: reaction is weak, action is strong). **The whisper:** the skipper's Day 311 letter mentions, in one unremarkable line, that he kept a small box of the deckhand's things left aboard, in case anyone ever came asking. Nobody asks until the arrest. The box opens in the accounting: a few photographs, bland, pinned where the player can study them and see nothing. At the finale playback Gerald goes still at one of them, asks Ally for it, asks her to keep it off the show: not yet, love, a few things to check first. Ally, plainly: he hasn't kept anything from a case since he retired, and he retired the year Dad died. **The cost:** the landlady's letter already told Ally the wall gap appeared the day after she aired the description: what she described, she erased, and the close says so. The connection lives in Gerald's head and one deliberately ambiguous frame; nothing settled moves; what he saw is committed at season planning, never in Ep1.

v2.1, 2026-09-01. The ChatGPT structure attack (five fronts, REWORK, `four-keys-structure-attack-chatgpt-2026-09-01.md`) and the overnight critical review are folded in under Stephen's two rulings of 2026-09-01: ① **the agency forks are adopted:** D3 forks play in chapter 7 and D4 forks the close, mutually exclusive flag-gated branch packages of equal mass, rejoining on the settled arrest, per the attack's findings 7 and 8; D1 and D2 stay lower-order with their promised consequences now mapped to named rows ② **chapter 1 is recut:** first tap at 12 to 15 seconds (F3 thereby ruled), the accident ruling and the keys inside the second package cycle (keys by ~0:45), the accusation landing exactly on p01_04's completion, and p01_09 board-first so Del interprets rather than repeats. Also applied: the census relabelled around the turns actually delivered (findings 1 and 5), the tap arithmetic done in one unit system (finding 2, with a correction: the 1,210 was gross taps including the tuned $\times 1.10$ overhead, which the attack's ceiling omitted; the unit mixing it caught was real), chapter 1's size mix and chapter 7's quick win repaired (findings 3 and 4), and the CC column labelled as rounded. Played packages remain 100; authored packages are now 105 (five branch pairs).

2026-08-31. Built on the ruled package economy model v1.1 (100 packages, 10 chapters, 1,600 T1eq, CC $\approx 6,880$ at 4.3, no optionals, variety mandated), spine v1.4 (three attack rounds, sweep PASSES on Margo's named lock), lead structure v1.0 (superseded; its 16 turn leads, four decisions, broadcast map, gate logic, redaction lines and Part F questions are salvaged here), cold open v0.4, the five v1.2, and the Four Keys rulings in memory. No prose. Every player-facing line is a placeholder and says so. The spine is not reopened; no beat in this document moves a spine fact, and none needed to. The v1.1 economy rulings are not reopened.

Code checked before trusting any spec (2026-08-31, this session): `LeadData` (`leadId`, `RequiredLeadIds` AND-gate, `SpawnLeadIds`, `requiresFlag/forbidsFlag`, banded rewards, generator and special rewards, `boardPhase`; requirements header says "max 3 recommended", not enforced) ·

`LeadRequirement.quantity` is `[Range(1,3)]`: no card asks more than 3 of an item · `LeadsRepository` (`CheckAndUnlockBlockedLeads` state-scan; flag gates re-checked in the same scan per the robustness rules) · `audio_investigation` T1 to T6 assets live in `Assets/ScriptableObjects/Items/` · **no package container exists anywhere in code** (no `PackageData`, no grouping id): Part G names every assumption this design makes about it, and the costing doc prices exactly those.

Governing rules, applied to every package in Part B:

- 1. **Every chapter turns belief at least once.** The 16 turn leads of v1.0 carry it; each package's beat is marked ★TURN or (t) texture. Unmarked texture does not exist in this document.
- 2. **Character-fact beats reveal previously unknown facts about the five and never touch the graph.** The five v1.2 is mined first; invented facts and invented routes are flagged NEW and batched in Part F5 for ruling.
- 3. **No beat surfaces a fact before its B6 day, and nothing reaches the player that Ally never learns.** Checked per package; the tight joints are named in the chapter notes.
- 4. **The surprise is "he is alive" and it lands where A5 lands it** (the landlady's letter opens the door on Day 326; the arrest closes it on Day 333).
- 5. **Art-with-caption payoffs are counted, not rationed** (Stephen: budgets later). The load-bearing ones are listed in Part F6 for the art bill.

Id decision. Packages are `fk_p<chapter 01..10>_<n 01..10>`, e.g. `fk_p04_09`. Cards inside a package are `fk_p04_09a`, `b`, `c` in bar order; assets `Lead_FK_P04_09a`; folder `Assets/Content/FourKeys/`; dialogue `Resolve_FK_*`. Why: `fk` is story-scoped and survives slot renumbering (R5, as v1.0 ruled); zero-padded chapter and index sort correctly in the editor and in `LeadsDatabase` tooling with ten chapters and ten packages; the card letter keeps the card id derivable from its package by eye. The database decides membership, never the folder (standing rule). Slot **ep01**; close sets `fk.ep01.complete`.

A. THE CHAPTER MAP

A chapter is roughly one sitting (the arithmetic in Part E makes it so; nothing enforces it). Ally's episode airs at the chapter boundary where that falls naturally, which is chapters 1 to 9; Ep 10 airs inside chapter 10, because a package whose deliverable is a deliberately empty broadcast is the point of that week (v1.0's ruling, kept). Days are the spine's A5 clock.

Ch	Title (placeholder)	Spine days	Airs at boundary	The chapter's turn(s)	Pkgs	T1eq
1	The Front Page	266 to 269	Ep 1 (269)	The accusation lands (p01_04) · she knew, not thought (p01_06) · the police door closes honestly, board-first (p01_09)	10	35
2	The Kitchen Table	270 to 276	Ep 2 (276)	The reading landed on Liam because the letter leans (p02_03; the slip is provenance texture, not a turn)	10	70
3	Whose Hand	277 to 283	Ep 3 (283)	Money moved in her last months · what she found had a shape (the download map is texture: attention, not belief)	10	105
4	The Wednesday Visitor	284 to 290	Ep 4 (290)	The letter reads built to fit Liam · Brad was inside the arrangement before it opened	10	135
5	Did She Say Anything	291 to 297	Ep 5 (297)	The lane man was the wrong build for Liam; Margo is the missing voice	10	170
6	Two Hours Up the Coast	298 to 304	Ep 6 (304)	Margo doubted the letter's meaning · if the thing was wrong there was a real thing, and it is missing	10	205
7	I Think Against I Know	305 to 311	Ep 7 (311)	The second letter is probably not hers, and nobody alive ever saw Brad write	10	215

Ch	Title (placeholder)	Spine days	Airs at boundary	The chapter's turn(s)	Pkgs	T1eq
8	The First Train	311 to 318	Ep 8 (318)	A man vanished out of Brad's life three years early · someone walked out of Kestrel Head at dawn · Ally stops saying "was" (p08_09)	10	220
9	One of a Kind	319 to 325	Ep 9 (325)	The town's one judge of hands could not place this one, and the only signwriter in the room is dead (p09_05; the broadcast assembly p09_08 is the climax act, not a turn)	10	220
10	The Man on the Wall	326 to 333	<i>(Ep 10, Day 332, airs inside the chapter)</i>	The landlady's letter (p10_01) · Margo was right first (p10_09; the arrest confirms, it does not turn)	10	225

How v1.0's 16 turn leads map in (the skeleton, relabelled per the attack): fk_frontpage → p01_01 (orientation, still not a turn) · fk_fourkeys → p01_04 (the accusation, real after the recut) · fk_sergeant → p01_09 (board-first after the recut) · fk_kitchen → p02_03 · fk_boxes → p02_06 + p02_08 (texture: provenance, not belief) · fk_calling_in → p03_02 · fk_gold_panel → p03_06 (the map at p03_09 is texture) · fk_liam → p04_06 · fk_bay3 → p04_09 · fk_asking → p05_06 + p05_08 · fk_tessa → p06_03 + p06_06 · fk_wrong_thing → p06_08 · fk_ithink → p07_03/04/05 building to p07_07 · fk_skipper → p08_01 · fk_platform → p08_05, and the re-string p08_09 is the unclaimed turn the census missed · fk_one_of_a_kind → p09_05 (the turn) + p09_08 (the act) · fk_close → p10_01 + p10_09 (Margo righted) with p10_07 as confirmation.

The 18 turns of v2.1: p01_04, p01_06, p01_09 · p02_03 · p03_02, p03_06 · p04_06, p04_09 · p05_06 · p06_06, p06_08 · p07_07 · p08_01, p08_05, p08_09 · p09_05 · p10_01, p10_09. Every chapter carries at least one; chapters 2, 5, 7 and 9 carry exactly one.

Evidence board phases (boardPhase): Phase 1 = chapters 1 to 3 (the public case) · Phase 2 = chapters 4 to 7 (the doubt) · Phase 3 = chapters 8 to 10 (the man).

Broadcast map (unchanged from v1.0): Eps 1 to 9 air at the ends of chapters 1 to 9 on Days 269, 276, 283, 290, 297, 304, 311, 318, 325; Ep 10 (Day 332) airs inside chapter 10 and is indistinguishable from Ep 9 by design; the arrest is Day 333.

Locations (new builds flagged, carried from v1.0): Ally's studio (exists), precinct steps (exists), Ruby's kitchen △, harbour café △, Regent cinema frontage △, boatyard △, fish market corridor △, Mariner's Row lane △, Tessa's kitchen △, harbour master's office △, inland halt platform △. Kestrel Head stays off the art bill: photographs and narration only, never playable.

B. THE BEAT AND PACKAGE TABLES

Format per row: # (package id is fk_p<ch>_<n>) · **Cards** (family letter + tier, ×q for quantity; A = Audio Investigation, lab, T1 to T6 · F = Forensic Tools, lab, T1 to T5 · D = Kestrel Corner Diner food, T1 to T12 · R = Rusty Anchor, junk drawer, T1 to T10; T1eq of tier n = 2⁽ⁿ⁻¹⁾ per item) · **T1eq** package total · **CC** on package completion (cards pay 0; Part G assumption 4) · **Beat:** ★TURN or (t) texture, payoff class in brackets (ET evidence turn · CF character fact · AL Ally line · AC art with caption), then the beat in one line · **Source** (B6 row numbers from spine v1.4; "v1.2" = the five; NEW = Part F5 batch) · **Fable** (the redaction delta: the

standing base is spine Part G plus all earlier packages' briefs; each line states only what is added, and what is never told).

Diegetic family reads (v1.0, kept): A = the tape and the show (tip line, letters read aloud, the broadcast itself) · F = documents and scene work · R = the harbour (yard, slip, market, the pub that changes its name) · D = door-knocking (cafés, kitchens, a witness's coffee).

Gating: within a chapter, packages chain (each requires the previous) except the parallel pairs named under each table; the last package of a chapter spawns the first of the next. Maximum simultaneous Available packages is 2, the bar's shipped comfort. Decisions (Part C) resolve inside the named package's completion dialogue. **Flag rule, amended at v2.1:** no flag ever gates a *shared* mainline package; the D3 and D4 branch packages are flag-gated in mutually exclusive pairs (*requiresFlag/forbidsFlag*, the shipped primitives) whose union is the mainline, so exactly one version is reachable in every state and nothing can starve.

Chapter 1 · The Front Page · Days 266 to 269 · 10 pkgs · 10 cards · 35 T1eq · 150 CC

FTUE, recut 2026-09-01 per Stephen's ruling (attack findings 3, 5 and 6): the accident ruling and the keys arrive in the second package cycle, the accusation lands exactly on p01_04's completion, p01_09 is board-first, and two packages carry two cards so the chapter has size mix. Lab families only (A and F flow from the first generator grant). The cold open v0.4 is spread across packages 1 to 10; the cut is Part D; the boundary sign-off is Stephen's (F4). First deterministic merge choreographed per §5.7.

#	Cards	T1eq	CC	Beat	Source	Fable
01	A1	1	10	(t)[AL] Ident and the death line: a signwriter, her stairs, nine months ago. First tap at ~0:13. Orientation, not a turn; it must never grow	54	Nothing new; VO is v0.4 as ruled
02	F1×2	2	10	(t)[ET] Her work in one breath, then the ruling pinned: accident, a fall, nothing more. The accepted account is on the board by ~0:45	54, v1.2	Violet's public work only; never the panel
03	A2	2	10	(t)[ET] Four keys and a letter in her handwriting arrive in the post: the dead woman arranged something. The keys are in play by ~0:50	54	Nothing new
04	A2 + F2 (two cards)	4	20	★TURN [ET] Her closest friends named, and the letter's sentence lands on this package's completion: she thought one of them was planning to kill her. Accident is now one of two readings	54	Nothing new beyond Part G
05	A2×2	4	15	(t)[ET] Not the police, and a locked door: her instruction, and the reason she gave	54	Nothing new
06	F2 + F2 (two cards)	4	20	★TURN [ET] The pact, the Saturday, and behind the door a second letter: this one didn't say she thought. It said she knew. A thing of hers beside it that two survivors will not name	54	Never what the object was
07	A3	4	15	(t)[ET] Then the group began to disappear: Brad's car, Margo's car, the same car park	54	Nothing new
08	A2×2	4	15	(t)[ET] The survivors walk into the police station separately and say the same thing: I'm afraid of the other one	54	Nothing new
09	A4	8	25	★TURN [ET] Board-first, then Del on the steps delivers the result the narration has held back: they looked, properly, the letters are really hers, and they found nothing. Del interprets: the file is closed to procedure; only people hold what is wrong here	64	Del says only what Part G gives her; never anything the file holds

#	Cards	T1eq	CC	Beat	Source	Fable
10	A2	2	20	(t)[AL] The Gazette war, the I-don't-knows, four friends and four keys, sign-off as ruled. Ep 1 publishes	54	Nothing new

Chain is strict (FTUE). Chapter notes: mechanical duties mirror e1_tip (entitlements, lab grant at p01, junk-drawer generator granted via p10's overflow, diner granted at p10 for chapter 2; aq.loc.rusty_anchor.active set by chapter 2 open). Three turns after the recut; 12 cards; the wake photograph moves into p01_04's beat presentation (AC) rather than its own package.

Chapter 2 • The Kitchen Table • Days 270 to 276 • 10 pkgs • 15 cards • 70 T1eq • 300 CC

Ruby. The room, the letters, the boxes, and the first hard date. Decision D1 in p03. The chapter's deliberate spike is p06 (the model's ruled early spike).

#	Cards	T1eq	CC	Beat	Source	Fable
01	D2	2	15	(t)[AL] Ruby's kitchen: the table the letters were worked at, the heater ritual Tuesdays held for years	55, v1.2	Ruby's kitchen and manner; never what the room concluded rightly or wrongly
02	F2, A2	4	20	(t)[AC] The key letter photographed: Violet's handwriting, her exact words, as an object on the board	55	The letters' full text as the survivors hold them; never that any of it is forged, or by whom
03	A3, D3	8	45	★TURN [ET] The room reconstructed meeting by meeting: the reading landed on Liam because the letter's own lines lean that way, and the one man who argued his side lost every time. D1 resolves here	55	Ruby's account of the meetings; the claims (yard, tin, ladder, board); never whether any claim is true
04	D2×3	6	20	(t)[CF] Frightened, Ruby talks: fills the room, allocates jobs, ends sentences with "anyway"; and the glass she holds is tonic, six years now	v1.2	The fact as hers to state plainly; never link her sobriety to any case fact
05	A3	4	20	(t)[CF] The four in the morning call, three years ago: Violet rang, Ruby drove over, and neither ever said what it was	v1.2	The call happened and stayed private; it is never explained, to anyone, ever
06	R4, R3, R3	16	60	(t)[ET] The boxes: a vanished man's whole flat catalogued, and nothing in it. The spike: days of careful nothing	41, 55	The boxes and their nothing; never why the nothing matters
07	A4	8	25	(t)[CF] Brad's habits, from Ruby: keys on the table moved twice, thank you like it cost him, up at five to run	55, v1.2	The habits verbatim (Fable wrote them); never that anyone else will recognise them
08	F4, F2	10	45	(t)[ET] In Ruby's envelope, the solicitor's covering slip: the letters were lodged three weeks before she died. Provenance, not a new belief (the player already holds her fear as prior); it becomes load-bearing at p07_04	62 (D276)	The slip and its date; Ally notes it without knowing what it proves; never what it will prove
09	D4	8	30	(t)[CF] The piano: sheet music past carols on Ruby's stand; grade eight at fourteen, and she lets the surgery think otherwise	v1.2, NEW route	The fact; never any bearing on the case (it has none)
10	A3	4	20	(t)[AL] Ep 2 publishes: the room, the letters (per D1), the boxes, the habits; and what airing costs Ruby	55	What aired per branch; never the audience it reaches

Parallel pair: p04 || p05 (both from p03; p06 requires both). Tight joint named: p08 uses row 62 the week it arrives (Day 276), as v1.0 did.

Chapter 3 • Whose Hand • Days 277 to 283 • 10 pkgs • 20 cards • 105 T1eq • 450 CC

The café, the cinema, the panel, and the download map. Money enters; what she found gets a shape.

#	Cards	T1eq	CC	Beat	Source	Fable
01	D2×2	4	20	(t)[AC] The harbour café at opening: her menu boards still out front; you eat under her lettering all over this town	56, v1.2, NEW route	The boards as public texture; nothing else
02	D4, A3	12	55	★TURN [ET] The café owner on record: she was calling her money in, for the lawyer, in her last months. Money moved; suspicion gets a category, not a face	56	She was calling money in; never who owed most, or why it matters
03	D3, F2	6	30	(t)[ET] What the money was for: the sister, the house, a solicitor on Civic Row; a fight she meant to win	56	The dispute in public outline; never where the tin's cash came from
04	F3×2	8	20	(t)[AC] The Regent marquee: three of six letters back, the ladder still chained under them, nothing finished. That is how you know she was there	v1.2	The unfinished job as image; never the ladder's history
05	D3, D2, A2	8	35	(t)[CF] The colour of the R: the cinema owner's running argument with her; she ranked people's handwriting out loud and told the truth about your kitchen	v1.2, 56	Her expertise and her manner; never that her judgement of a hand was ever wrong
06	A4, D4	16	70	★TURN [ET] The panel: a month of whose-hand sightings plotted; she carried a gold thing round town asking a question nobody could answer. Whoever hid it heard her asking	56	The whose-hand month; the panel only as witnesses loosely describe it; never what it is or whose hand
07	R4, D3	12	50	(t)[ET] Two signwriters up the coast, first pass: gold letters on a dark board, a hand neither could place	56	Their loose descriptions; never the mark's meaning
08	R4, R2, R1	11	45	(t)[ET] The ladder she let nobody climb threw her off it six weeks before she died: the fall on the record, the hip, the coincidence nobody called anything	21, 55	The fall as public-inquest fact and Ruby's memory of treating it; never the bolt
09	A5	16	75	(t)[ET] Ally's own download map: one town, four hundred miles away, listening every week. Held, never aired, never explained. Attention, not belief (the attack demoted it, correctly); it pays off at p10_02	61 (D283)	The map shows one persistent far town and Ally files it as odd; never what the town means
10	A4, F2, F2	12	50	(t)[AL] Ep 3 publishes: the money and the panel go on air. D1 held branch: the garbled leak lands here: a rival column runs a mangled version of the letter, and Ruby's on-air cost (you could have read it right) is this package's variant close	56; D1 map	What aired per branch; nothing else

Parallel pair: p04 || p05 (both from p03; p06 requires both). p09 sits on Day 283 exactly, the map's first week.

Chapter 4 • The Wednesday Visitor • Days 284 to 290 • 10 pkgs • 21 cards • 135 T1eq • 580 CC

Liam talks; the floor moves. Decision D2 in p09. The R family carries the yard and the market.

#	Cards	T1eq	CC	Beat	Source	Fable
01	R3, D2×2	8	35	(t)[AC] The boatyard: the crane, the slings, boats out of water; the place Liam is called staff and is not	58	The yard as place; never the third yet
02	R4	8	35	(t)[CF] A yard hand mentions it: Liam sings, real tenor, only in the crane cab with the door shut. Nobody else has ever heard it	v1.2, NEW route	The fact; never any bearing on the case (it has none)
03	A4, D3	12	50	(t)[ET] Liam talks: thirty-five years from the school bus, the third confirmed and owned, and why he let the town think he was staff	58, 32	Liam's side as he gives it, including the confirmed third; never whether the letter is right
04	A3, F3	8	35	(t)[ET] The tin claim tested: I never gave her a penny. Undisprovable either way, and he knows it	58	His denial and its unfalsifiability; nothing else
05	R4, A3	12	50	(t)[ET] The ladder claim tested: she told everyone which ladder. True, and useless	58	His answer; nothing else
06	A5, R4	24	100	★TURN [ET] The claims laid side by side: every one is true but innocent, or unfalsifiable. The letter reads like a case built to fit him. The word "built" enters the player's vocabulary, unaired	58	The laid-out spread as Ally assembles it; never whether "built" is correct
07	D4	8	35	(t)[CF] August 2014, Violet's kitchen, a bottle open, one question about her mother's house, and a laugh two people have spent twelve years hearing differently	v1.2, NEW route	The scene as Liam flatly gives his half; never whose side Violet was on (nobody knows)
08	R4, D3, F2	14	60	(t)[AC] The market at 05:40: Bay 3, the cages, the corridor door round the side where no camera looks, anyone with a key in market hours	57 setting, 27	The geography as Ally lawfully observes it; never who used it
09	R5, F4, A3	28	120	★TURN [ET] The fishmonger's tip: Brad was at the cage on the Wednesday, three days before the Saturday. The dead man went early. To Del the same day, never aired. D2 resolves here	57 (D290)	The tip verbatim; that it goes to Del within the day and is never aired; Ally's private vertigo, unexplained; never what the visit was for, or that anything was swapped
10	A4, D3, D1	13	60	(t)[AL] Ep 4 publishes: Liam's side airs; the tip is not in it; Ally sits with what she is holding. D2 market branch: this broadcast lacks Liam's consented follow-up, and his silence to the show starts here	58; 57 held	What aired and what is held; never the held thing's meaning

Parallel pair: p04 || p05 (both from p03; p06 requires both). p09 sits on Day 290 exactly.

Chapter 5 • Did She Say Anything • Days 291 to 297 • 10 pkgs • 24 cards • 170 T1eq • 730 CC

Margo becomes the missing voice. The mid-episode milestone closes the chapter (+20 energy).

#	Cards	T1eq	CC	Beat	Source	Fable
01	D3, R3	8	35	(t)[AC] Margo's office, shut: accounts for half the harbour, a desk squared to the millimetre, and nobody who can say what she was like at it	55, 58, NEW route	The office as image; never the file inside it
02	R4, A3	12	50	(t)[CF] A listener who swam with her for the county at fifteen writes in: the woman the town watched stand on the slip with a flask could outswim all three of them, and never corrected anyone	v1.2, NEW route	The fact and the letter; never why she stood and watched

#	Cards	T1eq	CC	Beat	Source	Fable
03	D4	8	35	(t)[CF] How Margo and Violet met: the undercharged door, the posted cheque, the note that said don't be a martyr. Fourteen years from that	v1.2 via 55/58	The story as the survivors tell it; nothing else
04	F3, D3	8	35	(t)[CF] The receipts bag: left every Tuesday for sorting, collected untouched every Friday, sorted by Margo herself. It had been a joke once	v1.2 via 55/58	The ritual; never the accounts it fed
05	D4, A4, R3×2	24	100	(t)[ET] Her last months mapped: the withdrawal from Ruby, the sharpened edges, and Sundays that were spoken for, nobody knew where. A silence with a shape	55, 58	The withdrawal as the survivors describe it; never who contacted her, never where the Sundays went
06	F4, A5, R4	32	140	★TURN [ET] A listener's letter re-measures the lane: No. 14's build set against Liam's. The man in the lane was the wrong build for Liam	R15 (D297), 18	The build letter and the comparison; never who the lane man was
07	F4, D3, A2	14	60	(t)[ET] The dashboard clock: ten minutes early to everything, always ten, sitting in the car until the hour. She went to that car park the way she went everywhere. Ally airs the oddity and does not resolve it	public account, v1.2	The habit and the juxtaposition as an open question; never the meeting
08	A5, A3, D3	24	100	(t)[AL] The ask composed: did she say anything, to anyone. Word for word once ruled; the week's broadcast is a question	A5 D297	The ask verbatim once ruled; never who will answer
09	D4, D3	12	50	(t)[CF] Since the funeral Margo made Ruby cry twice and apologised once: the true thing in the worst way, from the survivors who took it	v1.2 via 55	The sharpness as texture; never what the true things were
10	A5, R4, F3	28	125	(t)[AL] Ep 5 publishes, then three days of nothing: asking a city about a private woman gets you her dry cleaner. Milestone: +20 energy	A5 D297	The silence; never that an answer is coming

Parallel pair: p03 || p04 (both from p02; p05 requires both). p06 sits on Day 297; p07 to p10 complete the same broadcast week.

Chapter 6 • Two Hours Up the Coast • Days 298 to 304 • 10 pkgs • 23 cards • 205 T1eq • 880 CC

Tessa, the screenshot, the deduction. Decision D3 in p06.

#	Cards	T1eq	CC	Beat	Source	Fable
01	A4, F3, F1	13	55	(t)[ET] A letter with a screenshot attached arrives from a woman two hours up the coast (Day 300). The ask was answered once	59 (D300)	The letter's existence and its writer's fear of being found; never her history yet
02	D5, D3	20	85	(t)[AC] The drive: the coast road Margo took every second Sunday for eleven years, to a person none of the three ever heard named	59	The road and the ritual; never what the visits held
03	D4, A4	16	70	(t)[CF] Tessa: eleven years, a partner nobody in Havenbay knew existed. Margo had a whole second room to her life and kept the door shut without effort	59	Tessa as a person (v1.2-consistent); never who else used the channel
04	F4, A3	12	50	(t)[CF] The card in the kitchen drawer: in case, ring Tessa, a number. Margo prepared for exactly this eleven years ago; that is how Tessa learned Margo was dead	49 via Tessa	The card as Tessa's own experience; never the police file around it

#	Cards	T1eq	CC	Beat	Source	Fable
05	A4	8	35	(t)[CF] Tessa's fear, stated: eleven years of secrecy taught her a sentence can be an address. She consents anyway	59, carried from v1.0 D3	Her fear in her words; never whether the fear is justified (the spine holds no danger reaches her)
06	A5, F4, F3	28	120	★TURN [ET] The screenshot authenticated and dated (Day 77): the thing in the cupboard is wrong. It can't mean that. Margo doubted the letter's meaning, said so once, to one person. D3 resolves here	59, 42	The line verbatim; the channel's nature; never what Margo knew or when
07	F5, A4	24	100	(t)[ET] The deduction built: the cage letter's claims laid against everything the room ever verified, with Margo's line pinned across them	59, 30	The layout as Ally builds it; never that the deduction is correct
08	F5, A5, D4	40	170	★TURN [ET] If the thing was wrong there was a real thing, and it is not in the cage, not in the boxes, not in the estate. Something is missing from the world. The chapter's wall	59, 56	The deduction exactly as it will air; never what the real thing is
09	F4, A4, D3	20	85	(t)[ET] Close reading of "that": what did Margo think the thing could not mean? The board holds the question open; nobody alive can answer it	42, 59	The question as a question; never its answer
10	A5, D3×2	24	110	(t)[AL] Ep 6 publishes: the words air anonymised (per D3), the deduction airs, and the mailbox is watched	59	What aired per branch; never who is listening

Parallel pair: p03 || p04 (both from p02; p05 requires both). All of chapter 6 sits inside Days 300 to 304.

Chapter 7 • I Think Against I Know • Days 305 to 311 • 10 pkgs • 27 cards • 215 T1eq • 925 CC

The intellectual climax: the letter stops being Violet's. The turn is p07; p03 to p05 build it in the open. Chapter wall at p07 (+20 energy). **D3's fork lives here (ruled 2026-09-01, attack finding 7): p01 and p02 exist in two mutually exclusive branch versions, flag-gated, equal mass, rejoining at p03.**

#	Cards	T1eq	CC	Beat	Source	Fable
01v	F4, A3, D3	16	70	(t)[ET] Verbatim branch (aq.fk.d3.verbatim): two signwriters answer Ep 6's exact words with independent descriptions of the gilded panel. The rumour becomes double testimony	56	Their letters; never the mark's meaning
01p	F4, A3, D3	16	70	(t)[ET] Paraphrase branch (aq.fk.d3.paraphrase): one signwriter answers the softened ask, and Ally works the second description out of the café owner by legwork instead. Single-source testimony, harder won	56	One letter and a coaxed interview; never the mark's meaning
02v	F5, F3	20	85	(t)[AC] Verbatim branch: the side-by-side spread built from both letters, line against line, the crack corroborated twice. The episode's defining image at full strength	55, 30	The spread as an object; never its conclusion yet
02p	F5, F3	20	85	(t)[AC] Paraphrase branch: the spread built from one letter plus the shielding work: a separate board task scrubs every detail that could triangulate Tessa's channel before anything is pinned. The crack is uncorroborated and stays off the spread	55, 30	The thinner spread and the shielding as deliberate cost; never its conclusion yet

#	Cards	T1eq	CC	Beat	Source	Fable
03	A5, F4	24	100	(t)[ET] The certainty gap: the first letter says I think, and I may be wrong; the second says I know. Dead women do not usually get surer. Rejoin: both D3 branches land here. D2 market branch: Liam's first words to the show since Day 290 arrive this week (Day 311), a two-line return that names his silence	55, 30, 62; D2 map	The gap as Ally reads it aloud; never its cause
04	F4, A4	16	70	(t)[ET] The slip dates the first: lodged three weeks before she died, calm, provisioned, sealed. Fear with a filing system	62	The date doing its work; nothing else
05	A5, F3	20	85	(t)[ET] The second letter is kind to exactly one man: every line leans away from the one it mentions kindly, once, as the one she sent up the ladder	30	The kindness observed; never its author
06	R4, D4, A2	18	75	(t)[CF] The wedding that was a marathon: Ruby saw the results page in spring and said nothing. He lied about where he went, once, provably, about nothing that mattered. Or so it seemed	8 via 55	The fact as Ruby's held pebble; never what the lie was for
07	A5, F5, F3	36	155	★TURN [ET] A listener asks what Brad's handwriting looked like. Ruby cannot answer. Nobody can. Nobody alive ever saw Brad write cursive, and the letter is in cursive, and it is kind to him. The letter is probably not hers. Wall; +20 energy	R3a (D311), 30	Everything aired Day 311, the widest brief before the close: the second letter may not be Violet's and its kindness points at Brad. Never: the swap's mechanics, the panel's meaning, that Brad is alive
08	R5, D3	20	85	(t)[AL] Gerald's booth: a letter that passes examination is not proved hers, love; it is just not proved anyone else's. Method, not facts; canon register	canon (Gerald)	Gerald says nothing the police could not; method only
09	A5, F4, R4, D3, A1	37	160	(t)[ET] Ep 7 assembled: the gap, the slip, the kindness, the question nobody can answer, built into one broadcast	55, 62, R3a, 30	The broadcast as built; nothing beyond p07's licence
10	A4	8	40	(t)[AL] Ep 7 publishes and the mailbag opens: more post than any week before, and two letters in it that matter (unread). One card, one tap-run: a real quick win before the heavy week (attack finding 4's repair)	A5 D311	The volume; never the two letters' contents

Parallel pair: p01 || p02 (both from chapter 6's close; p03 requires both). p07 airs on Day 311 exactly.

Chapter 8 • The First Train • Days 311 to 318 • 10 pkgs • 25 cards • 220 T1eq • 945 CC

Alive becomes thinkable and is never said. The first five-card packages (p02, p09) with single-card quickies beside them (p04, p10).

#	Cards	T1eq	CC	Beat	Source	Fable
01	A5, R4	24	100	★TURN [ET] The skipper's letter: the deckhand who drank at Brad the signwriter's went missing three years before Violet, and was never found. One passing line: he still keeps a small box of the man's things left aboard, in case anyone ever comes asking. To Del, never aired. Brad acquires a shadow	10c, R6a (D311); F1 ruled	The letter verbatim including the box line, unweighted; that it goes to Del and is never aired; never what it means

#	Cards	T1eq	CC	Beat	Source	Fable
02	R5, R4, A4, D3, F3	40	170	(t)[ET] The harbour years mapped, five cards across the town: a man who lived aboard, kept a dry bag at a mate's, drank ashore, missed a sailing, and had a first name and a trade nobody ever asked for. First five-carder	10c, C8 via the skipper	The deckhand as the skipper knew him; never where the bag went, never the flat
03	R4, D3	12	50	(t)[AL] The harbour master's ledger of leavers: itinerant crews, men who go between tides, files closed as drifted. Men the sea is allowed to keep	C8 texture, NEW route	The class of men, lawfully; never this man's file contents
04	A3	4	20	(t)[AL] Ally files it: she cannot see what the skipper's letter means, and says so, and keeps it. A drawer with a weight in it. Quick win	R6a	Her not-knowing, honestly; nothing else
05	A5, F4	24	100	★TURN [ET] The platform woman writes: the first train out, the Saturday Brad's car was found, a man with wet boots paying cash. Someone walked out of Kestrel Head at dawn. To Del, not aired	60 (D318)	The letter, the boots, the cash single; never who was on the train
06	F5, R4, A3	28	120	(t)[ET] The timetable against the search: last train in Friday 17:10, first out 05:47, and a ridge path between them that a fit man could walk in a night. Built on the board, held, never aired	60, public timetables	The reconstruction as Ally's private working; never aired, never confirmed
07	D4, R3	12	50	(t)[CF] The clerk and the change: he complained about breaking a note at 05:40 and remembered the boots because of it. Small memory outlives tape	60, R10 via the letter, NEW compression	The texture of the sighting; never the tape (it expired)
08	A5, A3	20	85	(t)[AL] On air: if you were on that train, write to me. The letter itself goes to Del; the ask is the broadcast	60, A5 D318	The ask verbatim; never what Ally hopes
09	F5, A5, R4, D4, F3	52	230	★TURN [ET] The re-string, five cards: every card on the wall re-read in one sitting against a possibility Ally will not say on air. Her private note: I have stopped saying "was". Brad's survival becomes her operative belief, and the player's. Chapter wall (promoted by the attack: the census had this as texture and it is the chapter's third turn)	all held rows	Her private note exactly; never the word alive
10	A3	4	20	(t)[AL] Ep 8 publishes. Quick win; the week empties out	A5 D318	Nothing new

Parallel pair: p03 || p04 (both from p02; p05 requires both). p05 onward sits on Day 318's broadcast week; Del revives the deckhand's file on Day 312 off-page and the player never sees it (C7).

Chapter 9 • One of a Kind • Days 319 to 325 • 10 pkgs • 26 cards • 220 T1eq • 945 CC

Four descriptions become one object; describing it out loud is a decision with a cost. Decision D4 in p08 (climax wall, +2 Platinum Ingots). No asset in this chapter may depict the panel itself: the board shows the witnesses' composite, text and sketch fragments, never the object (F6).

#	Cards	T1eq	CC	Beat	Source	Fable
01	A4, D4, D3	20	85	(t)[ET] The four describers gathered: the café, the cinema owner, the two signwriters, four memories of one thing nobody has seen since she died	56	The witnesses' recollections; never where the thing is
02	F4, D3×2	16	70	(t)[ET] Cross-check one: black ground, gold capitals, an ampersand. The letters agree	56	The converging details; nothing else

#	Cards	T1eq	CC	Beat	Source	Fable
03	F4, D3	12	50	(t)[ET] Cross-check two: a crack across one corner. Three of four remember it; nobody knows how it got there	56	The crack as described; never its cause
04	F5, A4	24	100	(t)[ET] Cross-check three: a small mark bottom right that was not her name and not his. The strangest fact in the case	56	The mark as described; never whose it is
05	D4, A3	12	50	★TURN [ET] She ranked handwriting out loud: the woman who judged every hand in town could not place this one, and said so for a month. And the only other signwriter in her life is dead. Ally holds the juxtaposition privately and does not air it; the player holds it too. The chapter's turn (promoted by the attack: the panel starts pointing at its maker here)	v1.2, 56	Violet's expertise; Ally's private juxtaposition exists but is never aired and never confirmed; never the word Brad
06	R3	4	20	(t)[CF] The brush: sable on a handle cut from a broken oar, green tape at the ferrule, hers beyond mistake from across a road. What her hand looked like in the world. Quick win	v1.2	The brush as texture (Fable's seed, kept as texture per the spine); never a clue
07	A4, F3, R3	16	70	(t)[ET] Del asks: hold one detail back, so claims can be tested. She does not say why she asks	C7, v1.0 D4	Del's request and her silence about her reasons; never her private hypothesis
08	R5, A5, F5, F4	56	240	(t)[ET] The description assembled: one of a kind, and about to be spoken into every kitchen in the country, including one Ally cannot know about. Airing it is the only way to find it, and airing it warns whoever holds it. Consequential action, not a belief turn (the attack demoted it, correctly); the chapter's belief work was done at p05. D4 resolves here. Climax wall; +2 Platinum Ingots	56	The full description as assembled; Del's request; that Ally airs knowing the holder will hear; never whose mark, what it proves, who hears
09	A5, D4, R4	32	135	(t)[AL] Ep 9 airs the description (per D4). The player leaves the app having said it out loud	A5 D325	What aired per branch; never the burn (the player never sees it; Ally never learns it)
10	A4, R4, F3×2, D3	28	125	(t)[AL] The night after: nothing left to do but wait; the tip line light burning in a dark studio	A5	Ally's side only; nothing that happens 400 miles away exists in this game's render

Parallel pairs: p02 || p03 (both from p01; p04 requires both) and p05 || p06 (both from p04; p07 requires both).

Chapter 10 · The Man on the Wall · Days 326 to 333 · 10 pkgs · 32 cards · 225 T1eq · 975 CC

The letter, the wait, the arrest, the accounting. Strict chain: this week runs on rails and the fiction says so. Five-carders (p04, p08, p10) with quickies beside them (p03, p06). **D4's fork lives here (ruled 2026-09-01, attack findings 7 and 8): p08 to p10 exist in two mutually exclusive branch versions, flagged, equal mass, converging on the settled arrest and never on the record. The close's story shape inside each branch remains Stephen's F2 ruling.**

#	Cards	T1eq	CC	Beat	Source	Fable
01	A5, F4	24	100	★TURN [ET] A private message, Day 326: a landlady four hundred miles away; a quiet lodger under another name whose habits she has heard from strangers on air for six weeks; a wall with a pale gap where a black and gold thing hung until Tuesday. An address. Never aired	63 (D326)	Written last with the close (v1.0 rule kept): the final briefs are drafted only after every other package's prose is locked
02	A4, F3, D2	14	60	(t)[ET] 07:00, Del: everything handed over whole, the download map beside it as corroboration. Del moves inside the day	63, 61	As p01
03	D2	2	10	(t)[AL] The wait, day one: Ally holds the heaviest thing she has ever held and says nothing to anyone. Quick win	A5	As p01
04	A5, A4, F4, R4, D3	44	185	(t)[ET] Ep 10 built, five cards: an episode that must be indistinguishable from episode nine, because he listens. The player assembles a broadcast whose whole job is to be boring, and knows why	A5 D332	As p01
05	D4, A3, R3, D1×3	19	80	(t)[CF] What gave him away was never evidence: keys moved twice, thank you like it cost him, up at five. Six weeks of habits, told by people who loved him, heard by a woman who dusts his room	63, 55	As p01
06	A3	4	20	(t)[AL] Ep 10 airs, Day 332. Quick win; silence holds	A5 D332	As p01
07	A5, R4, F3	28	120	(t)[ET] The news, Day 333: arrested four hundred miles away, under a name that sat for three years in a missing-person file in Del's own precinct. Brad Collins, alive. Confirmation of p10_01, not a new belief (the attack demoted it, correctly); the week's dread pays off here without turning anything	public record D333	As p01
08a	A4, F4, R4, D4, F3	36	150	(t)[ET] Aired branch (aq.fk.d4.mark_aired): the sift, five cards. The mark went out on Ep 9 against Del's request, so every claim that followed is untestable; the accounting is done through a flood of false sightings, and the mark sits in the public record forever, where the next man who burns a life will read what gave this one away. The lasting exposure cost is on the board and in the close. And the skipper's box, kept three years in case anyone came asking, is finally asked for: a few photographs of the deckhand's, bland, pinned where anyone can study them (F1)	57, 60, R6a, within consent	As p01

#	Cards	T1eq	CC	Beat	Source	Fable		
o8h	F5, A4, R4, D3, F3	36	150	(t)[ET] Held branch (aq.fk.d4.mark_held): the clean identification, five cards. The held detail let Del test the landlady's message against something nobody else could know; the accounting lays every tip in its true place through one verified chain, and the mark never enters the public record. And the skipper's box, kept three years in case anyone came asking, is finally asked for: a few photographs of the deckhand's, bland, pinned where anyone can study them (F1)	57, 60, R6a, within consent	As p01		
o9a/o9h	A4, D3, F3	16	70	★TURN [CF] Margo's re-reading, branch-flavoured (crowded record against clean record): the frightened dissenter becomes the one friend who interpreted the substitution correctly, and the player re-ranks everything she did through the middle chapters. The turn the census missed (promoted by the attack)	59, A5	; and the notch lands (F1): playing the finale material for Gerald, he goes still at one of the deckhand's photographs, asks for it, asks for silence: not yet, love, a few things to check first. Ally: he hasn't kept anything from a case since he retired, and he retired the year Dad died	59, A5; F1	As p01
10a	A5, R4, D4, F3, D2	38	180	(t)[AL] Aired branch close: he is alive and what that un-writes; the survivors' war ends; the landlady is never named, and on this branch that anonymity is the one thing Ally managed to keep. The honest limit as ever. The notch's cost said plainly: the wall gap appeared the day after she aired the description; what she described, she erased (F1). Sign-off. +3 Platinum Ingots, +20 energy. Sets fk.ep01.complete; spawns cold_case_a, ep2_teaser (story shape is Stephen's, F2)	63 held, public record	As p01		
10h	A5, R4, D4, F3, D2	38	180	(t)[AL] Held branch close: the same arrest, the same limit, and a record that holds only what was true; Tessa's close line differs per D3, and the mark dies with the case file. The notch's cost said plainly here too: what she described, she erased (F1). Sign-off, grants, flag and spawns identical to 10a	63 held, public record	As p01		

C. THE DECISIONS

The four decisions of v1.0, re-placed at package boundaries. Their class analysis stands unchanged and is not restated in full here (v1.0 Part C is the reference); what follows is the placement, the axis, and the standing caveat.

The limitation, re-drawn at v2.1 (attack findings 7 and 8, Stephen-ruled 2026-09-01): the spine's clock and arrest are fixed and no decision moves who is arrested or when. v2.0's four decisions all shared one package graph, which failed the agency gate: zero decisions changed play. v2.1's repair, adopted as GPT specified: **D3 and D4 are mechanically divergent** (mutually exclusive branch packages of equal mass: p07_01/02 and p10_08/09/10, different requirements, different beats, different record left behind), and **D1 and D2 are lower-order** with their promised consequences now mapped to named rows (p03_10's garbled leak; p04_10's silence and p07_03's return). Both forks converge on the settled arrest; what never converges is the player's route and the human record left behind.

D	Package · Day	The choice	Class	Branch flags
D1	fk_p02_03 · ~272	Ruby's letter read whole on air, or only what Ally can verify	B, lower-order	aq.fk.d1.aired / aq.fk.d1.held · held branch: the garbled leak and Ruby's cost land at p03_10 (mapped row)
D2	fk_p04_09 · 290	The tip to Del raw, or Bay 3 on tape first then both handed over	A, lower-order	aq.fk.d2.direct / aq.fk.d2.market · market branch: Liam's silence starts at p04_10 and his two-line return lands at p07_03 , Day 311 (mapped rows)
D3	fk_p06_06 · ~302	Margo's words verbatim anonymised, or paraphrased with the channel shielded	A, mechanically divergent	aq.fk.d3.verbatim / aq.fk.d3.paraphrase gate p07_01v/01p and p07_02v/02p (different testimony, different spread, the shielding task; crack corroborated only on verbatim); tails at p09_03 and p10_10 stand
D4	fk_p09_08 · 325	The mark aired, or held at Del's request	A, mechanically divergent	aq.fk.d4.mark_aired / aq.fk.d4.mark_held gate p10_08a/08h, 09a/09h, 10a/10h (the sift against the clean identification; different requirements and payoff art; the record differs forever)

Placement checks, v2.1: one live decision at a time; D1's consequence lands at p03_10 and D2's at p04_10/p07_03 (mapped rows, no longer unplaced); D3's fork resolves inside chapter 7 (rejoin at p07_03) with perceivable tails at p09_03 and p10_10; D4's fork runs to the close and converges on the arrest. Branch pairs are mutually exclusive by requiresFlag/forbidsFlag and their union is the mainline, so exactly one version of each forked package is reachable in every state and no state starves. Branch masses are equal (16/16, 20/20, 36/36, 16/16, 38/38 T1eq), so the 1,600 envelope holds on every path. Clock check: no B6 day moves on any branch; the burn, the landlady, Del's 07:00 and the arrest hold in all sixteen reachable flag states. Authoring note: **100 packages played, 105 authored** (five branch pairs); the Fable brief and art bills count the authored number.

D. CHAPTER 1, IN SECONDS

The cold open v0.4 (~470 words, ~3:20 at 140 wpm) spreads across chapter 1's ten packages. **Recut 2026-09-01 per Stephen's ruling and the attack's findings 5 and 6:** no words are rewritten and no sentences reordered; only the boundaries move. The accident ruling rides with the biography so no package is career texture alone; the keys arrive in the second cycle; the accusation is the payoff of p01_04's completion; p01_09's police result is spoken only after its board work.

The ruled shape, boundaries pending Stephen's line-level sign-off (F4):

Pkg	vo.4 stretch	~Words	~Seconds	Note
po1_01	"This is Echoes of Havenbay" to "...bottom of her stairs."	28	12	First tap at the segment's end
po1_02	"Violet painted signs..." to "...nothing more."	71	30	Biography and ruling in one breath: the accepted account, never career texture alone
po1_03	"But two weeks later..." to "...written in Violet's handwriting."	28	12	The keys are in play by ~0:50
po1_04	"Their names were..." to "...leave behind four keys."	59	25	The accusation lands on this completion: the turn
po1_05	"She also told her friends..." to "...was the reason she had become afraid."	33	14	
po1_06	"The four friends called each other..." to "...what that object was."	91	39	The pact, the Saturday, she knew: the second turn
po1_07	"Then the group began to disappear." to "...three days after that."	60	26	
po1_08	"That left Liam and Ruby." to "...I'm afraid of the other one."	30	13	
po1_09	Board work first, then "A sergeant I trust..." to "...they could use." as the Del scene	33	14 + scene	The result is heard only after fulfilment; Del interprets
po1_10	"Now Liam and Ruby are accusing each other..." to the ruled sign-off	100	43	

First interaction: ruled 2026-09-01 at ~0:12 to 0:15 (the seeded pair pulses under po1_01's VO and the board accepts the tap at the segment's end). F3 is closed; I6's FTUE doc should be updated to record the ruling when the FTUE build locks.

Timeline (draft): 0:00 ident and the death line · ~0:13 first tap (one A-T1: the §5.7 choreographed deterministic merge) · ~0:45 the accepted account pinned · ~0:50 the keys land · ~1:20 the accusation (po1_04, the first turn) · ~2:10 she knew (po1_06, the second turn) · ~2:50 the disappearances and the walk-ins · ~3:30 Del on the steps after the chapter's heaviest board work (po1_09, the third turn, A-T4) · ~4:30 sign-off, Ep 1 publishes, chapter 1 ends. Chapter 1 net energy $\approx$ 23: comfortably inside the FTUE tank with the whole open played.

Mechanical duties (systems pass, not this document): po1_01 carries the FTUE entitlements and the lab grant exactly as e1_tip does; the junk-drawer generator arrives via po1_10's overflow; the diner is granted at chapter 1's close (first D card is po2_01); aq.loc.rusty_anchor.active is set at chapter 2's open (first R card is po2_06). Wired and verified in the editor, not asserted here.

E. ECONOMY CONFORMANCE

E1. The envelope, met exactly

Ch	Pkgs	Cards	T1eq	v1.1 envelope	Net energy (flat 1.55)	CC	CC at 4.3
1	10	12	35	35	$\approx$ 23	150	151
2	10	15	70	70	$\approx$ 45	300	301
3	10	20	105	105	$\approx$ 68	450	452

Ch	Pkgs	Cards	T1eq	v1.1 envelope	Net energy (flat 1.55)	CC	CC at 4.3
4	10	21	135	135	≈87	580	581
5	10	24	170	170	≈110	730	731
6	10	23	205	205	≈132	880	882
7	10	25	215	215	≈139	925	925
8	10	25	220	220	≈142	945	946
9	10	26	220	220	≈142	945	946
10	10	32	225	225	≈145	975	968
Total	100	223	1,600	1,600	≈1,032	6,880	6,880

Column notes (v2.1): the **CC at 4.3** column is **rounded per chapter and indicative**; the ruled totals reconcile exactly at 6,880 (the attack's 6,883 sum is the rounding artefact, now labelled). The **net energy (flat 1.55)** column is an indicative flat-yield figure superseded by E3's refined computation; it is kept only because the envelope was ruled against it. Cards are **played** cards; the D3/D4 branch pairs keep card counts equal per branch, so every path plays 223.

No chapter needed a budget different from the envelope: the variety the beats wanted fit inside it, so nothing was taken. Card count lands at 223 against the model's derived working figure of 250 (average 2.23 cards per package, 7.2 T1eq per card against the model's 2.5 and 6.4). The ruled numbers (100 packages, 1,600 T1eq) are met exactly; the card figure was always derived, and the difference is that this design prefers a slightly heavier single card over two trivial ones where the beat is one object (the letter, the slip, the screenshot). The attack confirmed no wall-class package exists (heaviest 56 T1eq against The Listener's 160-class) and named `fk_p06_o8` and `fk_p09_o8` as the concentrated-build tuning risks; both stay watched. If the tuning pass wants more board actions per package, the mechanical conversion is $T4 \rightarrow T3 \times 2$ and $T5 \rightarrow T4 \times 2$ at identical T1eq; it changes nothing in this document but the Cards column.

Rewards riders (draft): +20 energy at `p05_10`, `p07_07`, `p10_10` (total +60); +2 Platinum Ingots at `p09_o8`, +3 at `p10_10` (total 5, matching the shipped episode). Toasts per \$5.7 on every package of 3+ cards.

E2. The variety evidence (the ruling's test)

Package sizes across the episode (played, v2.1): **27 one-card, 38 two-card, 26 three-card, 3 four-card, 6 five-card**. Within chapters, against a mechanical ramp:

- **Chapter 1 now mixes sizes** (attack finding 3's repair): two two-card packages (`p01_o4`, `p01_o6`) among the FTUE singles.
- **Chapter 2 carries the ruled early spike**: `p02_o6` (the boxes, 16 T1eq, three cards) sits beside 2 and 4 T1eq singles.
- **Chapters 7 to 10 keep quick wins beside the heavy builds**: `p07_10` (one A-T4 card, a real quickie after finding 4's repair), `p08_o4` and `p08_10` (single A-T3 quickies beside a 52 T1eq five-carder), `p09_o6` (single R-T3 beside the 56 T1eq climax), `p10_o3` and `p10_o6` (2 and 4 T1eq singles in the finale week).
- **No chapter is monotonic**: chapter 8 runs 24, 40, 12, 4, 24, 28, 12, 20, 52, 4; chapter 10 runs 24, 14, 2, 44, 19, 4, 28, 36, 16, 38.
- **Tier spread inside chapters**: chapter 10 spans T1 to T5; chapter 5 spans T2 to T5; the five-carders mix three or four families each.

- **The heaviest single package** (p09_08, 56 T1eq, three T5s and a T4) is the climax and is far below The Listener's 160/185-class walls: the mass lives in the spread, which is the model's whole point.

E3. The tap and session arithmetic, done in one unit system (rebuilt at v2.1 per the attack's finding 2)

By family: **A 630 · F 377 · R 291 · D 302** (after four diegetic swaps that moved the boxes and the ladder work to the junk drawer). A podcast-and-documents episode is honestly A and F shaped, and the lab's tuned yield is the worst of the three generators.

Gross taps, per family at the tuned yields, then overhead: $A+F 1,007 \div 1.3355 = 754 \cdot R 291 \div 1.7427 = 167 \cdot D 302 \div 1.6975 = 178 \cdot$ subtotal 1,099 · ×1.10 waste overhead (the Schedule B baseline's factor) = **≈1,209 gross taps**. (The attack called v2.0's 1,210 arithmetically impossible against a 1,198 ceiling; the ceiling omitted the overhead factor, so the figure itself was right. What the attack correctly caught was the unit mixing below, which v2.0 did commit.)

One unit system, as the baseline defines it: a tap costs one energy, so gross taps = gross energy demand; net external energy = gross taps minus in-episode energy grants (the baseline's 233 taps and 213 net differ by the L5 +20 grant, the same rule). Grants here are +60 (E1's riders), so **net external energy ≈ 1,209 – 60 = 1,149 ≈ 11.5 free session-tanks** at the 100-energy tank.

Sessions, stated honestly: ~11 to 12 free sittings at this family mix, against the 8-to-10 guide; ads (+20 ×5/day) and the ladder narrow it for players who use them. Chapter shape at the refined figure (episode average ≈0.756 taps per T1eq): chapters 1 to 3 clear inside a tank; chapters 4 to 7 run 0.9 to 1.2 tanks; chapters 8 to 10 run 1.6 to 1.7, which is two sittings each in practice. **The levers, for the tuning pass, in preference order:** shift 100 to 150 T1eq of texture mass from A/F to R and D where the diegesis allows (the boxes, the harbour legwork, the door-knocking can all carry more), which brings net energy near 1,080 and the count to ~10.5; or retune the lab drop table; or accept 11 to 12 (the v1.1 ruling made 1,600 tunable once the beats existed, and this is that trade arriving with real numbers attached).

E4. The beat census (relabelled at v2.1 per the attack's finding 1; v2.0's census was materially wrong)

Payoff class	Count	Of which ★TURN
Evidence turn (ET)	51	17
Character fact (CF)	20	1 (p10_09: Margo righted)
Ally line (AL)	21	0
Art with caption (AC)	8	0
Total	100	18

The relabels, on the record: demoted to texture: p02_08 (provenance), p03_09 (attention), p09_08 (consequential action), p10_07 (confirmation); promoted to turns: p01_06 (she knew), p08_09 (stopped saying "was"), p09_05 (the trade juxtaposition), p10_09 (Margo righted); made real by the recut rather than relabelled: p01_04 (the accusation now lands on its completion) and p01_09 (board-first). Net count is still 18, which says v2.0 had the right amount of turn and the wrong addresses. Texture packages: 82, every one marked (t) in Part B. Every chapter carries at least one turn; chapters 2, 5, 7 and 9 carry exactly one. Character facts: 20, of which 14 are mined straight from the five v1.2 (the tenor voice, the piano, the county swimming, the 2014 kitchen, the 4 a.m. call, the tonic, the habits, the flask, the cheque, the receipts bag, ten minutes

early, the sharpness, the brush, ranked handwriting) and the rest are Tessa, the deckhand and the clerk from the spine's own texture. New facts and routes: none touch the graph; all are batched in F5.

E5. The three weakest beats, named honestly

1. **fk_p08_04 (Ally files it)**. The beat is the absence of understanding: she holds the skipper's letter and cannot read it. Inherited from v1.0's lead 14, which was the thinnest full lead; as a package it is one card and twenty seconds, which is the right size for it, but a player who does not feel the weight will read it as filler. Kept because the close's identification is unbuyable without the player having held this letter as unexplained cargo, exactly as Ally does.
2. **fk_p05_05 (the Sundays)**. The board work maps a silence: withdrawals, sharpened edges, Sundays spoken for. The belief change is real but negative-space shaped, and it is the largest texture package in its chapter (24 T1eq), which risks toll-booth reading on a beat about nothing visible. Mitigation: the payoff line is the chapter's thesis (a silence with a shape) and the very next package is the chapter's turn.
3. **fk_p10_03 (the wait, day one)**. One card, one line, pure pacing. It exists to put air between the handover and the built broadcast, because the fiction needs the week to feel held. If any package in the episode is cuttable, it is this one; it is also two T1eq, so it costs the player forty seconds. Named so the cut, if it comes, is deliberate.

Also watched, defended: p01_01 (orientation, not a turn; the FTUE's price, capped at one merge) and p10_04 (a package whose deliverable is a deliberately boring broadcast; the point of the week, and the riskiest ask of the player's trust in the set).

Postscript at v2.1: the attack judged this section's self-diagnosis "not honest enough": the three named weaknesses were expendable texture while the census itself misaddressed a third of its turns. Accepted; the census above is the attack-corrected one, and the standing lesson is that a census is a claim to verify, not a property of having written one.

E6. Spine-day audit

Checked package by package against B6 and A5: p02_08 uses row 62 in its arrival week (Day 276, the tight joint v1.0 also carried) · p03_09 sits on Day 283 exactly · p04_09 on Day 290 · p05_06 on Day 297 (R15) · p06_01 on Day 300 (row 59) · p07_07 airs R3a on Day 311 · p08_01 reads the skipper's Day 311 letter after Ep 7 · p08_05 on Day 318 (row 60) · chapter 9 assembles sources dated 283 to 311 and airs Day 325 · p10_01 on Day 326 (row 63). Nothing aired precedes its A5 episode; everything held is shown held; nothing reaches the player that Ally never learns; the burn (Day 325 night) is never rendered and never known to Ally or the player. **Pass.**

Two private-inference items, watched and deliberately inside the line: p08_06 (the timetable reconstruction) and p09_05 (the trade juxtaposition) are Ally reasoning privately from lawful material, never aired and never confirmed by the game. Both are the class of thing v1.0's fk_bay3 already established (the player suspects and cannot say what of); neither surfaces a B6 fact early. Flagged for the attack rather than hidden.

F. THE QUESTIONS FOR STEPHEN

Each in the ruled form: the question · what the structure needs · what changes otherwise. Stop there.

F1. The season notch: RULED, Stephen, 2026-09-01

Reached through a three-source blind batch (39 one-liners, `four-keys-notch-candidates-v1.md`) that Stephen rejected in favour of his own design, then sharpened together. **The whisper:** the deckhand's photographs, kept by the skipper in a box "in case anyone came asking", opened at the accounting when someone finally asks; Gerald goes still at one of them at the finale playback, asks for it and for silence: not yet, a few things to check first. Ally's anchor line dates his retirement to her father's death. Reaction became **action:** the player carries three questions out of the episode (what did he see, what will he do, why couldn't he say), and learns without being told that Gerald's own investigation never ended. **The cost:** what Ally described, she erased; the close says it plainly. **The retrospective payload** (the Thursday-run line, and whatever the frame holds) stays invisible in Ep1 and is committed at season planning, per §3.4's explicit-decision rule. Landed in p08_01 (the box line), p10_08a/h (the box opens), p10_09a/h (Gerald), p10_10a/h (the cost). Δ Standing follow-on for season planning: rebase the §3.3 ladder off The Listener, and decide what the photograph holds before Ep2's spine.

F2. The close's shape, and the teaser (carried, extended)

The v1.0 candidate stands (the accounting after the arrest is public; Margo's words in the record; the landlady never named; the honest limit about the staircase; final image, Liam and Ruby in the same harbour crowd).

New half of the question, from the v1.1 economy ruling: does an Ep 2 teaser beat live inside the close package, as a story beat with no extra play (the shipped `ep2_teaser` spawn is story-neutral tail either way)?

Changed by v2.1: the close now exists in two D4 branches (p10_08 to 10, a/h); the ruling shapes both, and the branch mechanics are already ruled, so F2 is now purely the story shape and the teaser yes/no. **Needs:** the close's beats confirmed, and the teaser yes/no. **Otherwise:** the close packages and the final Fable briefs cannot be written, and chapter 10 ships as a stub.

F3. The first-interaction number: RULED, Stephen, 2026-09-01

~0:12 to 0:15, the early tap, as part of the chapter 1 recut ruling. I6's band is superseded for this episode; the FTUE doc records it when the build locks. Closed.

F4. The cold-open cut boundaries (carried, changed by this structure)

Part D's ten-way cut supersedes v1.0's three-way proposal. Every Ally line is Stephen-ruled and a cut is an edit: the ten boundaries need ruling (or a coarser regrouping onto fewer of chapter 1's packages, which the structure tolerates without renumbering). **Needs:** the boundary ruling. **Otherwise:** chapter 1's dialogue assets cannot be assembled.

F5. The new-character-facts batch (new, one ruling for the lot)

All invented texture in one place, per the kickoff rule. Facts marked CANON are v1.2 or spine texture and only the **route** to Ally is new; nothing below touches the graph, and each is safe at every future reveal because it explains nothing and forecloses nothing.

#	Package	The new thing	Fact status
1	p02_09	Ruby's piano surfaces via sheet music on her stand during the kitchen sessions	Fact CANON (v1.2); route NEW
2	p04_02	A yard hand mentions Liam's tenor, cab door shut	Fact CANON (v1.2); route NEW
3	p04_07	Liam gives his half of August 2014, flat and unwilling	Fact CANON (v1.2); route NEW; the beat states only his half and no adjudication

#	Package	The new thing	Fact status
4	p05_01	An office neighbour describes Margo's shut office	Fact trivial; route NEW
5	p05_02	A former county teammate writes to the show about Margo's swimming	Fact CANON (v1.2); route NEW
6	p03_01	The café's menu boards and archive photos of Violet's public work, via Arthur Finch's Gazette morgue (canon role)	Facts CANON; route NEW (the morgue holds sign photos)
7	p08_03	The harbour master talks generally about itinerant crews and files closed as drifted	Fact class CANON (C8); route NEW; he never opens this man's file to her
8	p08_07	The clerk's complaint about the change rides inside the platform woman's letter (she was at the window)	Facts CANON (R9, R10); compression NEW
9	p08_01, p10_08/09	The skipper kept a small box of the deckhand's things left aboard, photographs among them, in case anyone came asking	Fact NEW; RULED 2026-09-01 as part of F1 (spine ledger gains row 10f)

F6. Art-with-caption beats that are load-bearing (new, for the art bill)

Decorative AC beats are not listed; these carry story weight and their art fails the beat if it fails: the wake photograph (now inside p01_04's beat presentation, per the recut) · the key letter as object (p02_02) · the Regent marquee with the chained ladder (p03_04) · the market corridor at 05:40 (p04_08) · the coast road drive (p06_02) · the side-by-side letter spread (p07_02, reused p07_09) · the witness-composite of the panel (p09_08 and p09_09: **text and sketch fragments only; no asset may depict the panel itself, in this episode or any marketing**) · the pale gap on the lodger's wall, if the close ever shows it (p10_01: recommend narration only, keeping the landlady's world unrendered) · **the deckhand's photographs (p10_08/09, F1, load-bearing): a few bland frames the player can study and see nothing; the art brief must author at least one frame with an unremarkable background element that can later become significant without repainting; what Gerald saw is committed at season planning, never in Ep1's assets; unlike the panel, these may be shown freely, their job is to give nothing.** Ten dedicated AC payoffs exist in total plus the photographs; the count is reported, not rationed, per the ruling.

G. PACKAGE-CONTAINER ASSUMPTIONS (for the costing doc)

There is no package container in code (verified this session). This design assumes, and the costing doc prices exactly:

1. **A package is a data container above lead cards:** either a PackageData ScriptableObject holding ordered member card ids, or a packageId field on LeadData plus a manifest; the costing doc chooses. Cards are ordinary LeadData assets and flow through LeadsRepository, LeadOutcomeMB and the save path unchanged.
2. **A card carries exactly one requirement slot** (one family+tier, quantity 1 to 3, inside the shipped [Range(1,3)]). The schema supports up to 3 slots; v2.0 uses one per card so the bar reads one item per chip. Every Cards cell in Part B is a list of such single-slot cards.
3. **Package fulfilment = all member cards Activated.** The beat presentation (dialogue, art+caption surface, character-fact card) fires once, on the completing card's activation, via the package container;

member cards before the last play at most a toast (§5.7 pacing on 3+ card packages).

4. **CC, energy, ingot and special rewards are package-level** (paid by the completing card or the container); member cards pay 0. Part B's CC column is the package payout. Banding stays on the shipped SoftCurrency field of the completing card if no container reward field exists.
5. **Gating is package-to-package**, implemented with the shipped primitives: every card of package N+1 carries RequiredLeadIds = the member card ids of package N (AND-gate semantics already in CheckAndUnlockBlockedLeads), or the container resolves it; either way no new gate machinery is strictly required. Parallel pairs gate both packages on the same predecessor.
6. **All cards of an Available package are simultaneously Available** (player picks order within the package); at most 2 packages Available at once, so the bar holds at most ~7 chips in the worst five-carder pair (UI grouping by package is the leads-bar work item in the systems bill).
7. **Save schema: no new aggregate.** Package state is derivable from activated card ids (the shipped _activatedLeadIds set persisted by the existing save path); the container never persists its own state. If the costing doc finds it must, the save aggregate rule applies (fold into BoardSaveSystem, crash-boundary tests mandatory).
8. **Ids and assets** as ruled in the header: fk_p<ch>_<n> packages, fk_p<ch>_<n><letter> cards, Lead_FK_* assets, Assets/Content/FourKeys/, database-decides-membership, slot ep01, no replay (R6), decision flags aq.fk.d1..d4 never gate a shared mainline package; the D3/D4 branch pairs are flag-gated mutually exclusive package versions (requiresFlag/forbidsFlag, shipped primitives; v2.1) whose union is the mainline, so the container needs no new gate machinery for them either.
9. **Family availability:** lab (A, F) from p01_01; junk-drawer generator via p01_10 overflow; diner granted at chapter 1 close; aq.loc.rusty_anchor.active set at chapter 2 open. Mirrors the shipped e1_tip duties; wired in a systems pass with editor verification.
10. **Analytics:** package_complete events with chapter, package id, T1eq, session index; the §7.7 climax watch attaches to p09_08 and p10_04.

The systems bill named in the economy model v1.1 (leads-bar grouping, beat presentation surface, package gating, FTUE teaching, analytics) sits on top of feature/multi-episode-audit, which is still unmerged and not play-verified; nothing here changes that sequencing.
